

STS educational programme

### To connect to the live webinar follow the instructions below:

- You must connect from a computer with an Internet connection and speakers. It is not necessary to have a webcam.
- It is preferable to connect to the internet by cable compared to the Wi-Fi connection since, being a constant stream of video, any interruption can cause cuts.
- We recommend the **use of chrome** against other browsers, although the platform is compatible with all browsers.
- When you access the streaming display area you will find a video player where you can follow all the sessions that are broadcast live. The player has the buttons for **"play"**, **"pause"** and **"full screen"**.
- Under the player you will find a link to an alternative streaming system that you must access in case you experience viewing problems with the main player.
- If during the event you want to send a question to the speakers, you can use the button enabled for this purpose at the bottom of the video player **"live questions"**. Write the question and to whom it is addressed and it will reach the moderator.
- At the end of the session, a survey will appear for you to anonymously assess the webinar.
- We have enabled a contact telephone number that you will find on the platform in case you have any queries or problems with viewing the live video. **Call us at any time and we will help you.**
